

## **Standard Cost Data Book 2022-23**

### **TPL Ahmedabad Distribution**

Distribution Licensee is required to prepare and publish Standard Cost Data book as per " Licensee's power to Recover Expenditures Incurred in providing Supply and Other Miscellaneous charges 2005" issued by GERC. The Standard Cost Data book is a basis of making the initial estimate for laying of electric line and/or erection of electrical plant for extending supply to the applicant. The chapter 6 of Regulation is reproduced as under:

*'The Distribution licensee and the Transmission Licensee shall prepare a cost data book covering broad specifications of various items and materials as well as man-hours of various categories of labour needed for providing any electric line or electrical plant used for the purpose of giving supply of electricity based on the actual cost data of the financial year immediately preceding the year in which the estimate is to be prepared'*

The Regulation provides preparing the Cost data book based on actual data of financial year immediately preceding the current year. The standard Costs for various activities have been prepared based on latest purchase order.

As per above explained principle, the standard Cost Data book 2022-23 is prepared and shown in Annexure A, within which serial no. 1 to 44 represent HT activities, serial no. 45 to 88 represent LT activities and serial no. 89 to 121 represent EHV activities.
